### Monoscope

Monaural stethoscope complete with PVC sound tubing and female Luer connector, comfortable single ear piece for constant monitoring of the patient.

The monaural stethoscope is molded of sufficient durometer to accurately reflect sound, yet soft enough to ensure comfort while being worn. The ear piece is more or less C-shaped and is inserted into the grooves of the ear.

Clinical experience indicates that the medium size normally fits the greater proportion of users.

### Slick® Stylette ET

- Malleable, coated wire holds shape to facilitate safe intubation
- No crack, peel, or flake nylon coating for smooth tube insertion
- Packaged sterile and disposable
- SURELOC® Stop helps maintain desired stylette position safely
- Handle-forming capability for a better grip
- Packaged 25/box, 4/boxes per case

Part No.	Size	OD/FR	Fits Tube Size
500	Pedilette (pediatric)	6	2.0 – 3.5
750	Midlette (sm. adult)	8	4.0 – 6.5
1000	Slick (adult)	10	7.0 – 10.0

### SHER-I-SLIP®

- Dependable stiffness retains desired curve during oral intubation
- Blue color improves visualization

Part No.	O.D. For Tube Size	Length
5-15101	10 FR, 5.0–10 mm I.D.	34 cm
5-15102	5 FR, 2.0–4.5 mm I.D.	25 cm

### SHERIDAN® T.T.X.

- Tube replacement is quick and efficient
- Flexible for easy insertion

Part No.	For Tube Size	Length
5-24000	2.5–4.0 mm I.D.	56 cm
5-24002	4.0–6.0 mm I.D.	81 cm
5-24004	6.0–8.5 mm I.D.	81 cm
5-24006	7.5–10.0 mm I.D.	81 cm

### Slick Set® Pre-formed Stylette and ET Tube Combination

- Compliant, kink-resistant medical grade, PVC
- Available uncuffed or with a mid-high volume, low pressure cuff
- Packaged sterile and disposable
- Assembled in advance for immediate use
- SURELOC® External Connector gives optimal airflow and manageability
- Full radiopaque line for tube depth visualization
- Packaged 10/box, 5 boxes per case

Part No.	Description
1500	Uncuffed
1700	Cuffed

### Stylette Stop

Adjustable stop of black delrin for use with the copper stylette 00-478, 00-469, and 00-470.

Part No.	Description
00-479	15 mm female end

### Fiberoptic Malleable Lighted Stylette

The Fiberoptic Malleable Lighted Stylette provides illumination during intubation and also incorporates the features of a malleable stylette. With the benefits of fiberoptics, the bulb is securely encased in the handle. The lighted malleable stylette assists in the visualization required for the proper placement of the tracheal tube during intubation and effectively illuminates the soft tissue of the neck. Uses two "AA" batteries.

Part No.	Size
00-469	Adult
00-470	Pediatric

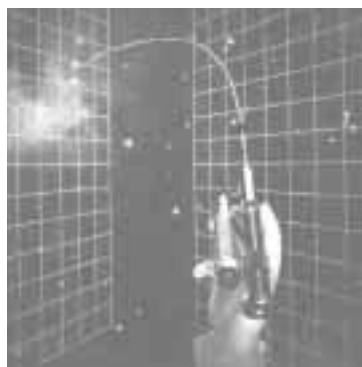

### Fiber Optic Stylite™ Intubating Stylette

- Improved visualization
- Eliminates possibility of a bulb being dropped in the airway
- Fiber optic light is cool and white
- Overall length—18" adult
- Overall length—14" pediatric

Part No.	Size
9-0204-18	Adult
9-0204-14	Pediatric

### The Shuttle – Fiberlightview™ Lighted Stylette Features

- Tracheal examiner
- Cavity illuminator
- Malleable fiberlight stylette
- Stainless steel construction
- Can be sterilized
- Adjustable stop—to regulate length of stylette in E.T. tube
- Used with batteries
- Attached to AS-150 Light Source
- Attached to CCD Camera
- Attached to AS-2000 Monitor
- Used as a teaching stylette

Part No.	Size
2000-00	Adult – 33 cm; 4.5 mm E.T. tube minimum
2001-00	Pediatric – 21 cm; 3.5 mmm E.T tube minimum

### Trachlight® Style and Tracheal Lightwand

Light-guided intubation using the Trachlight is a safe and gentle technique for both oral and nasal ETT placement and positioning. Compared with traditional laryngo-scopy, the complication rates can be significantly reduced with Trachlight.

- Less mucosal bleeding
- Few postoperative sore throats
- Reduced hemodynamic response

Research has shown that even in the most challenging patients, light-guided intubation with Trachlight has a 99% success rate with an average time to intubate of less than 25 seconds.

Part No.	Description
621000	Trachlight lightwand handle
621121	Disposable Trachlight wand – infant
621111	Disposable Trachlight wand – child
621101	Disposable Trachlight wand – adult
621151	Reusable Trachlight wand – infant
621141	Reusable Trachlight wand – child
621131	Reusable Trachlight wand – adult

## Shikani Seeing Stylet™

### Optimum Visualization and Illumination for Management of the Difficult Airway

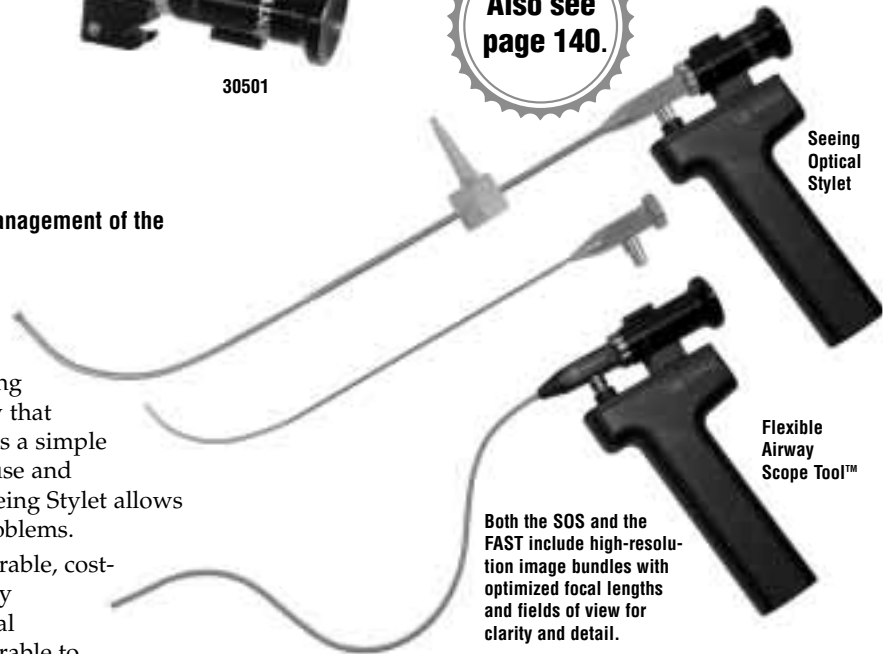

The Shikani Seeing Stylet is the airway management tool that provides immediate, clear visualization of the airway. The optimized design of the imaging and illumination system guarantees a view that makes recognition of anatomical landmarks a simple task. Combine a great image with ease of use and unlimited adjustability, and the Shikani Seeing Stylet allows you to handle the most difficult airway problems.

The robust, modular design results in a durable, cost-effective instrument that has utility in every practice setting. Whether it is in the hospital or in an ambulance, performance is comparable to instruments costing five times as much.

- Assembles in seconds
- Variable stiffness shaft allows shape to be easily adjusted
- Sealed construction; compatible with most cleaning and sterilization processes
- Available in adult (5.5 mm I.D. or larger) and pediatric (3.0 mm to 5.0 mm I.D.)
- Integral O<sub>2</sub> port provides quick connection to oxygen sources
- Compatible with existing proximal mount cameras
- Numerous illumination options available

Part No.	Description
30000	Stylet - adult
30001	Stylet - pediatric
30200	Stop, adult tube
